Instruction Guide

Glad to see you joined the course.
Here are some tips for taking the course

Action Icons

open to edit

open folder

open web page

reload web page

download

copy

delete

Occasionally calls for you to take action may not be appear in written or spoken in audio instructions. So watch for these icons in visuals. When you see them, you need to act.

Course Files Folder

course_files.zip

The files for the course are found in the `course_files.zip` file.
You can download them from the course online.
They are designed so you can repeat the examples shown in course materials.

Section File Folders

```
course_files/section_folder_name  
course_files/section_folder_name  
●  
●  
●  
course_files/section_folder_name
```

The `course_files` folder is organized into folders for sections presented in the course.

Section File Folders

practice_files_guide.pdf

A section may also have a `practice_files_guide.pdf` file.
Look for this in the course materials as a lecture.

Section File Folders

```
course_files/section_folder_name/supplemental/resources.html
```

```
supplemental/resources.html
```

Each section may have a resources.html file.
It contains references to technology concepts and terms used in the course materials.
You might keep this file open to quickly navigate to web links mentioned when discussed.

Section File Folders

```
course_files/section_folder_name/supplemental/snippets.txt
```

```
supplemental/snippets.txt
```

A section with practice files also has a snippets.txt file.
This file has code or text that you copy and paste into the exercises files.
Keep this file open in a code editor for handy access.

Exercise Files and Folders

```
course_files/section_folder_name/start  
course_files/section_folder_name/new  
course_files/section_folder_name/practice  
course_files/section_folder_name/checkpoint_01  
course_files/section_folder_name/checkpoint_??  
course_files/section_folder_name/completed
```

start

new

checkpoint_01

checkpoint_??

completed

practice

Sections with practice files use these folders to organize the files.

Exercise Files and Folders

`course_files/section_folder_name/start`

start

new

checkpoint_01

checkpoint_??

completed

practice

The start folder contains the files for starting a new section.

Exercise Files and Folders

```
course_files/section_folder_name/start
```

start

new

checkpoint_01

checkpoint_??

completed

practice

The practice folder is where all work is done.
It used for all editing and testing.
You can empty it at any time.
Do not delete any other files or folders.

Exercise Files and Folders

```
course_files/section_folder_name/start
```

start

new

checkpoint_01

checkpoint_??

completed

practice

To start or restart a section you can safely delete all the files in the practice folder. Then replace with the files in the start folder. Also check the [practice_files_guide.pdf](#) for any additional setup instructions.

Exercise Files and Folders

```
course_files/section_folder_name/new
```

start

new

checkpoint_01

checkpoint_??

completed

practice

The new folder is included when exercise files are carried forward from a previous section. The new folder is only informative snapshot of any files added to the start folder from the previous section.

Exercise Files and Folders

```
course_files/section_folder_name/checkpoint_??
```

start

new

checkpoint_01

checkpoint_??

completed

practice

The checkpoint folder files contain snapshots of file changes as you proceed through a section. These are helpful for you to compare your work as you follow along.

Exercise Files and Folders

```
course_files/section_folder_name/checkpoint_??
```

start

new

checkpoint_01

checkpoint_??

completed

practice

Or in case you run into some bugs.

Exercise Files and Folders

```
course_files/section_folder_name/checkpoint_??
```

supplemental/snippets.txt

start

new

checkpoint_01

checkpoint_??

completed

practice

You can safely replace files in the practice folder when you reach these checkpoints. Look in the snippets.txt file for checkpoints.

Exercise Files and Folders

```
course_files/section_folder_name/completed
```

start

new

checkpoint_01

checkpoint_??

completed

practice

The completed folder has the finished files for the section.
In some cases they are a work in progress for the next section.

Exercise Files and Folders

```
course_files/section_folder_name/completed
```

start

new

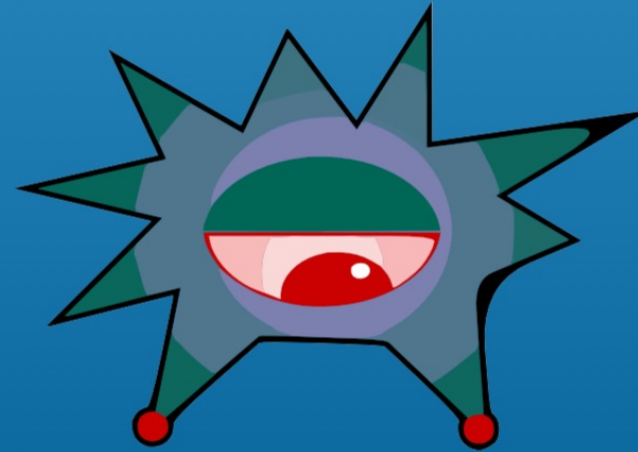

checkpoint_01

checkpoint_??

completed

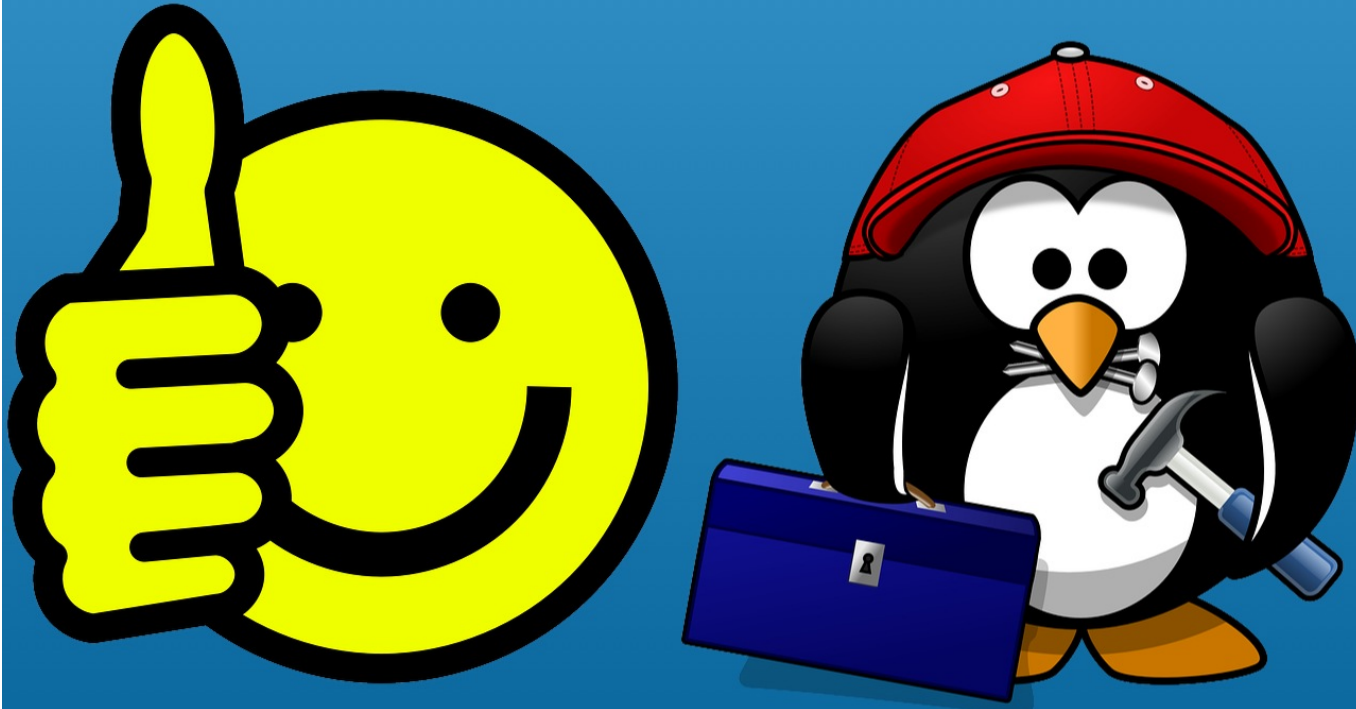

practice

Again you can use these for looking for problems in your own code following along. And you can use them for references in doing your own projects.

Getting Started

That is it!
Hope it helps
