Stripe Checkout Pages Using PHP

Understanding the UI

Practice Files Guide

With Lon Hosford

This is a Visual Step by Step Workbook and voice transcript for accompanying video for this portion of the course.

Ready for a new set of topics?
We are going to work with the Stripe Embedded Checkout Form.
Just 5 steps to get setup to get rolling.

practice_files/**03_understanding_ui**

In the course_files folder, open the 03_understanding_ui folder.
This is the base folder for all files in this section.

Empty the practice folder if necessary.
This may be the case if you are repeating the section.

start

practice

Now you can copy the files from the start folder and paste to the practice folder.

supplemental/**snippets.txt**

practice/**common.inc.php**

practice/**base.css**

practice/**checkout_simple.php**

Next in a code editor, open the files listed.
This will give you a head start when they are needed in video lessons.

practice/common.inc.php

```php
12  // Stripe API keys
13  $st_test_secret_key = "YOUR SECRET KEY";
14  $st_test_public_key = "YOUR PUBLISHABLE KEY";
15
16  // File path to the Strip library
17  $path_to_stripe_lib = dirname(__FILE__) . '../../../stripe-php-2.1.1/';
18
19  include_once($path_to_stripe_lib . 'init.php');
20  ?>
```

```php
12  // Stripe API keys
13  $st_test_secret_key = "sk_test_____";
14  $st_test_public_key = "pk_test_____";
15
16  // File path to the Strip library
17  $path_to_stripe_lib = dirname(__FILE__) . '../../../stripe-php-2.1.1/';
18
19  include_once($path_to_stripe_lib . 'init.php');
20  ?>
```

Insert your Stripe test mode API keys to the common.inc.php file.
Then save.

Done!

That is it!
You can go to work.
